THE TOIKE OIKE

VOL. XI. UNIVERSITY OF TORONTO, MARCH 11, 1921. NO. 6

Engineering Society Elections

Nominations

ENGINEERING SOCIETY EXECUTIVE

PRESIDENT—
1. JACK LANGFORD.
2. H. H. LAWSON.

VICE-PRESIDENT—
1. THOS. GILMOR.
2. C. I. CARSON.
3. H. M. MORRIS.

TREASURER—
1. L. J. POTVIN.
2. H. J. COULTER.
3. C. A. NORRIS.

CORRESPONDING SECRETARY—
1. J. H. BROWNE.
2. R. G. MORRISON.
3. H. J. MEREDITH.

RECORDING SECRETARY—
1. G. M. CROSSGROVE.
2. H. A. BARRETT.
3. C. S. SNEYD.

CURATOR—
1. J. W. REID.
2. G. H. ROWAT.

CHAIRMAN OF CLUBS

CIVIL CLUB—
1. E. W. COCKERLINE.
2. G. A. McCLINTOCK.

MINING AND METALLURGICAL CLUB—
1. J. DRYBROUGH.
2. H. A. OAKES.

ELECTRICAL AND MECHANICAL CLUB—
1. W. C. C. DUNCAN.
2. S. F. EVERSON.

CHEMICAL CLUB—
1. R. R. PARKER.
2. A. E. H. FAIR.
3. H. B. MEYER.

ATHLETIC ASSOCIATION EXECUTIVE

PRESIDENT—
1. W. B. RAMSAY.
2. K. L. CARRUTHERS

VICE-PRESIDENT—
1. M. P. MacLEOD.
2. E. A. AGNEW.

SECRETARY-TREASURER—
1. J. G. JOHNSTON.
2. ROBERT RELYEA.
3. M. D. EARLE.
4. H. E. WINGFIELD.

YEAR PRESIDENTS

IV YEAR PRESIDENT—
1. H. A. BYSSHE.
2. WILLIAM FOLEY.
3. S. COULTER.

III YEAR PRESIDENT—
1. J. FARLEY.
2. W. E. BENNETT.
3. F. J. LYLE.

II YEAR PRESIDENT—
1. G. W. SMART.
2. C. D. SHARPE.
3. J. M. DYMOND.

YEAR ATHLETIC REPRESENTATIVES

IV YEAR—
1. K. GREIG.
2. W. V. BISHOP.

III YEAR—
1. F. S. SEABORNE.
2. W. B. JENNINGS.
3. E. L. BAIRD

II YEAR—
1. K. V. HEYLAND
2. C. S. WILLIAMS.

STUDENTS' ADMINISTRATIVE COUNCIL REPRESENTATIVES

IV YEAR—
1. H. G. THOMPSON (acclamat'n).

III YEAR—
1. F. A. UPPER.
2. A. M. REID.
3. F. A. MURPHY.

II YEAR—
1. W. A. OSBORNE (acclamation).

PERMANENT EXECUTIVE OF GRADUATING YEAR

PRESIDENT—
1. J. F. YOUNG (acclamation).

VICE-PRESIDENT—
1. J. M. BREEN
2. H. R. BURTON.

SECRETARY-TREASURER—
1. E. J. MARSH.
2. G. D. MAXWELL.

"SCHOOL" Y.M.C.A. EXECUTIVE

PRESIDENT—
1. F. S. GLOVER.
2. D. BURNS.

VICE-PRESIDENT—
1. J. W. MacINTOSH.
2. J. LLOYD BONHAM.

SECRETARY-TREASURER—
1. L. C. JACKSON.
2. J. C. DUMBRILLE.

CIVILS

Keep the Civil Club on top by putting in a good man to guide its destinies. By voting for COCKERLINE, you vote for a live man, whose aim is to keep things humming, and to have a year that will go down to posterity as the best ever in the history of the Club. He has ably assisted Pete Culliton this year, and can assure you of a year filled with interest, instruction and jollity. Think of your own interests and vote for COCKERLINE.

FOURTH YEAR PRESIDENT

The Fourth Year President has a real life size man's job, what with the Torontonensis and the graduation dance and dinner, etc., etc., etc.

So under these circumstances, what are we going to do about it? The answer is obvious—elect Stan. Coulter as next year's President. He helped to run the last School dinner.

Anyone who is fond of hockey will know why. He is the original patron saint of the Blue-Bird Bus that runs between here and the little city that lives by a bluff. You all know how he organized trips to the Ambitious City to see the hockey games.

There was something funny about those trips; it took two and a half hours to go there, and only two hours to come back. Are automobiles like horses, or was it something about Hamilton?

However, that has nothing to do with Stan. Coulter. The point is—he has an ingenious and enterprising mind, which is what we want for Fourth Year President.

Devoted to the interests of the Undergraduates of the Faculty of Applied Science

Published Every Now and Then by the Engineering Society of the University of Toronto

OFFICERS FOR 1920-1921

President—R. W. Downie
Vice-President—K. L. Carruthers
Treasurer—J. A. Langford
Corresponding Secretary—B. H. Miller
Recording Secretary—J. Farley
Curator—W. E. Bennett
Fourth Year President—J. R. McLean
Third Year President—H. G. Thompson
Second Year President—H. B. Bell
First Year President—W. A. Osbourne
Civil Club Representative—P. J. Culliton
Mining Club Representative—A. E. O'Brien
Electrical Club Representative—
M. C. Stafford
Chemical Club Representative—
A. D. R. Fraser
Architectural Club Representative—
T. L. Young

THE QUESTION

The time has come when the helm of the Engineering Society must be given over to new hands for safe keeping for the coming year.

On whom, then, shall we lay the responsibility? Upon new and untried shoulders, capable though they may be, or upon a man of proven ability, and one who is in addition, thoroughly conversant with the duties which he must assume?

Let us glance at Jack Langford's qualifications for the highest honor the Engineering Society has to bestow, an honor which must not be lightly conferred upon the whim of the passing moment.

To anyone who has seen him at work in the Supply Department, his unfailing good humor and tact and his essential friendliness are apparent. As one look at his face will show, he is not a man to be stampeded into a hasty judgment, but once having chosen his course, he will follow it firmly to the end.

As Treasurer he has co-operated closely with all the members of the Executive during the past year, and he keenly realizes the duties that are before him; very fortunately, too, he is not one of those men who is overtroubled with the fear of examinations. His first year was 1914-15, so that he is both of the "old" and of the "new" School. As to his war record, few men can show a better one.

In 1919-20, before he took office, he was prominent on the School water-polo team. Last fall he rowed in the School eight that defeated Victoria in the University finals. Such a combination of abilities is rarely found in one man.

What, then, is the answer to the question?

ATHLETIC REPRESENTATIVE

Bishop is the man for Fourth Year Athletic Representative. He is one of those bleedin' soccer players that we see every fall on the back campus with balls bouncing off the place where their brains ought to be. Also, he plays hockey—he plays it very well, too—that is, he considers he does—so do I, too, but then I'm no judge.

However, that's neither here nor there, for he is the enthusiastic boy with the shining morning face.

So vote for him.

VICE-PRESIDENT SOCIETY

Having been nominated for the position of Vce-President of the Engineering Society, I hereby solicit your vote.

In the event of being elected I pledge myself to administer the affairs of my department to the best of my ability and judgment and always with an eye to your interests, that you may receive the maximum of benefit from the Society. By careful management and attention to details in my department, I intend to insure that the integrity of the Society is maintained.

THOS. GILLMOR.

For VICE-PRESIDENT of ATHLETIC ASSOCIATION

VOTE

M. P. MacLEOD

CARRUTHERS

For the Presidency of the Athletic Association of School a man should be chosen with experience, not only in every branch of sport, but also experience in executive work. Carruthers has twice been Captain of the track team, played senior rugby, inter-faclty basketball, and is taking up rowing. In addition he has been Vice-President of the Engineering Society and a member of the Athletic Directorate.

Carruthers has worked hard for School all year; he secured the best sections for School for the Inter-collegiate hockey games.

TREASURER OF THE ENGINEERING SOCIETY

This is a BIG JOB—a BIG MAN is required for it. L. J. Potvin is the man. Experience is required. He has had a great deal of it, and therefore is extremely capable to handle the funds of the Engineering Society. Give him YOUR vote, and you do the greatest thing possible for the Society.

2T4

PRESIDENT

W. J. W. Reid

for

CURATOR

E. AND M. CLUB

As Engineering along electrical and mechanical lines is rapidly becoming more and more prominent, it is absolutely necessary that the connecting link between the practical and academic side should be as strong as possible.

The E. and M. Club serves this purpose and can not hope to fulfill its purpose without a strong executive.

A strong Chairman means a strong Club. Mr. Duncan's executive ability is well known. He was Second Year Representative for the Club. For three years he has been President of the Wireless Association of Ontario. As such his duties included the reorganization of the Club and the arranging of the speakers for the meetings. He has thus formed a worth-while connection with prominent engineers.

Organizing ability is the main requirement of the Chairman of any Club.

Vote for Duncan and make next year a banner year for the E. and M. Club.

DYMOND FOR PRESIDENT

What's on your "bill-of-fare" for next year, 2T4?

Well, we have to look after 2T5, receive them according to "School" tradition, and insure strict compliance with our new Frosh rules. We have to pull together with a class spirit that will make 2T4 the most aggressive aggregation in "School" and "Co-operation" must be our motto.

We must have a full programme of class activities, see to it that our year is well represented in all branches of

Experience and Personality.

Treasurer, 2T3, '19-'20.

Recording Secretary, Eng. Soc., '20-'21. Etc., etc.

THE MAN WITH THE EXPERIENCE AND THE QUALIFICATIONS DESERVES YOUR VOTE.

"School" activities and that our share of honors is a creditable one.

A pretty healthy programme, old-timer, and I sure wish you luck with it; but say, do you think you can make it go?

Why, sure! Say, you don't know 2T4. They are a bunch of live wires and this man Dymond—well, he is just about IT when it comes to getting a crowd to pull together and "put over" something big.

His five years' army experience, in which he started at the bottom and worked his way on his merits to the commissioned ranks, have given him an experience which enables him to accept such a responsible position as President of 2T4 with confidence.

As a student he is second to none, and as a man—well, look him over and judge for yourself. Experience, executive ability, diplomacy and personality are his to use in the best interest of his year.

DYMOND FOR PRESIDENT 2T4.

PAT MURPHY

The man we need on the S.A.C. from 2T3. The map of Ireland's on his face, but he repudiates the Sinn Fein. Work's his middle name. Known in the year as the "tapping artist," he will boost inter-faculty scraps and tame the freshmen. Murph crossed the pond with the "flag-wavers" and was a valuable member of the 1st Division Signals up to their demobilization. Coming back, instead of hiding his ight under a bushel, he came to School to brighten our lives. Put him on the S.A.C. and let us have real, live representatives to put School at the top of the heap.

CROSSGROVE

The word "School" to an S.P.S. man means more than simply the building in which he takes his lectures, and why? Because "School" is and always has been the most active faculty in U. of T. Its students are endowed with a peculiar brand of spirit, commonly called "School spirit," which they alone can brew.

Who are the men who put the proper ingredients in the still for our "School spirit"? You said it! Our own Engineering Society. They made our password UNITY.

Are you seriously considering the interests of School for 1921-22? If you are, get behind the right men for the Engineering Society offices.

"A man for a man's job," and in Crossgrove for the office of Recording Secretary you have all the requisites of a genuine "School man." His proven executive ability in his own year, his army experience, and the man himself as he is to those who know him personally, recommend "George" for Recording Secretary.

RELYEA

"Relyea for Secretary-Treasurer of the Athletic Association." This slogan ought to put the vote of every real "School" man solid for Relyea. As a clean, hard boxer, Relyea has won his way into the hearts of every man who likes to see sportsmanship of the highest type as manifested by Relyea.

He has made his name known throughout the University by his perseverance and courage, and these same characteristics should carry him through to the office he seeks.

Remember when voting:

Relyea,
The little man with the big
Punch.

FIRST YEAR JOYFUL

The last week has brought out a candidate for "President" of 2T4 whom the first year are proud of. In the person of "Chuck" Sharpe the Freshmen have found the embodiment of their ideal President. "Chuck" graduated from Parkdale Collegiate in Toronto and enlisted in the Royal Navy as a wireless officer, but after a short time transferred to the Royal Naval Air Service, in which he served with noticeable distinction. For some two years he patrolled the North Sea and was an active pilot in the aerial defence of Calais and Dunkirk. "Chuck" was in last year's "Prep." class, where his pleasing disposition and genial countenance won him the large degree of popularity which is so pronounced amongst the members of 2T4.

VOTE

FOR

MEYER

Chairman

Chemical Club

Your Vote and Influence Solicited for

McCLINTOCK

for

Chairman of Civil Club

The work of the retiring President and his executive commands only the most favorable criticism.

The dances of 2T4 are famous throughout the School, and so are the smokers. Sharpe is the man who, we believe, can not only be a President of an executive equally as good, but who will make an even better year beginning next term.

"Chuck" says he has a platform unsurpassed by none. There should be less drafting. He advocates free residence for out-of-town students; more women in the School; a female stenographer for every class, thus allowing students to pay attention to the "profs" instead of writing notes; free smokes in the Engineering Society, and free taxis for all School dances.

VOTE F. J. LYLE PRESIDENT 2T3

The magnitude of 2T3 naturally throws great responsibility on the shoulders of its President. He should be a man capable of bearing this heavy burden. It is also necessary that he be capable of inspiring confidence in the rest of the year and of moulding it into a strong union. It certainly should be a case of leave it to the President. If we back him, he'll see us through—that's what he is there for.

Now, friend Paddy is just such a man. His heart follows his interests, and what he goes after he gets if it's humanly possible. The year would certainly be most fortunate in being represented by such a man.

To say nothing of his overseas service, there is one thing which should be common knowledge to the year as a whole; that is, the flood of athletic activities between the various departments, which has been admitted as being the greatest thing for bringing individuals together that the year has known. Who was behind it all? Who engineered the whole thing? Lyle.

If a man will take it unto himself to do things like this with no authority whatever except a keen desire to keep up the spirits of the year, what will he do if given proper authority?

This is merely one of many details to ponder on.

Vote for the live wire and your confidence will certainly not be misplaced.

ONE WHO KNOWS AND VOTES.

CHEMICAL CLUB

If you have tears, prepare to shed them now—or else elect A. E. H. Fair as Chairman of the Chemical Club, and wear a perpetual smile. Here you have

ASK THE MEN WHO SHOULD KNOW!

They Are Voting

LAWSON

PRESIDENT

OF THE

Engineering

Society

the most important office in School (excepting President of the Engineering Society) to be filled, and the livest man in School ready to fill it. What more do you want? You will doubtless hear a certain amount of flattering clap-trap on behalf of Mr. Fair's opponents. Don't be misled. It is considered good form to speak well of the dead.

Eat, drink and vote FAIRly; or tomorrow you may sigh. Here is a man who will distill into the old School a little of that pure Chemical Spirit. Fair has more ideas to the square minute than there are yawns in a four o'clock lecture. Confront him with a hard problem and he will stick to it like a label to a bottle, and, like the label, he will indicate the solution. Before him difficulties vanish like apparatus left on the lab. table over-night.

And so we urge
Fair
And
Impartial
Readers
vote FAIR
for Chairman Industrial Chemical Club
and weep not.

MORRISON

The man to vote for Corresponding Secretary of the Engineering Society is Bob Morrison. Bob's a returned soldier with a distinguished career in the Air Force. In finishing his term of gamboling with the pigeons, he entered "School" last year with dire intent upon its dy's and dx's and from that date has been an ardent "School man" in every sense of the word. He's the kind of fellow who is always found wherever there's an occasion for a "Toike Oike" or a "Ripperty, Rapperty," in short, the kind of man who deserves a job like this.

And he's fitted for this position. In the first place, Robert wields a persuasive quill (I've copied quite a few of his lab. reports and know), and secondly he has the necessary experience and personality to ably represent the Society in dealing with visiting speakers and all the other people with whom the Society does business, which comprises the special duties of the Corresponding Secretary.

H. J. MEREDITH

FOR

CORRESPONDING SEC'Y
ENG. SOCIETY

It is well known that every member of the Executive of the Engineering Society is a beast of many burdens. His own special job is just a side line and he has to jump into the work wherever he's needed. Bob's the kind who'll do more than his share, for he has so much interest and enthusiasm in everything that pertains to "School" activities that his work will be a pleasure.

In conclusion, I take the liberty of stating to all School voters, that when you cast your vote for Bob Morrison you are giving a substantial lift to the Executive of the Engineering Society of next year, and to all activities which it affects.

MORRIS

The Engineering Society needs for its Vice-President a man of sound business principles, with a sense of his responsibility, who will give his attention to the innumerable little details of his department. It is the minor details, the so-called "trifles," seemingly of little importance, when looked at individually, but not to be ignored when taken as a whole, which to a large extent decide the success or failure of an undertaking.

The Vice-President must also be a strong right-hand man to the President, ready to act for him as occasion demands.

"Where can such a man be found?" you may ask. He is here in our midst —Bert Morris. He is a man of whom it can be said, in all sincerity, that he possesses the necessary qualifications. A quiet, earnest worker, who believes that any job, however small, is worth doing well, Morris deserves the vote and confidence of every "School" man who has the interests of his faculty at heart.

He has had considerable experience with business and construction concerns, which is no mean asset. A passing mention might also be made concerning his war record.

School athletics have a strong supporter in Morris, and he does not limit himself to moral support alone. He was a member of the School rowing team which "cleaned up" in the inter-faculty competition.

Put Morris where he rightly belongs, in the Vice-President's chair.

Jack Coulter

For

Toike Oike Treasurer

TO THE ELECTORS OF 2T3

Gentlemen:—

The time has arrived when your chief executive must be a man who has the interest of the whole year at heart. He must be a man free from any group ties and obligations. He should be prepared as your chief executive to administer the affairs of the year impartially and to the general satisfaction of you—the electors.

His interest should not lie wholly in any one group, but in the whole year, and in the faculty. It is imperative that he be thoroughly conversant with all University activities in order that the experience of others may be used to advantage.

Feeling that my past experience on the Engineering Society Executive, interest in all School affairs, as well as University affairs, qualify me to stand for election as your President, and thanking you in anticipation of your vote and support, I am,

Yours truly,
W. E. BENNETT.
